You can help ARK: Survival Evolved Wiki by expanding it. This article is about content that is exclusively available in the version on Mobile. God's Console is a soleplayer feature alone in ARK: Survival Evolved Mobile. Overview[edit | edit source] God's Console can be used in singleplayer to access cheating. Permanent access to the Lord's Console can be obtained with a purchase of \$14.99 USD and €16.99 eu. The characteristics of god's Console include: Sources - Tap on the source icon to give birth to the following heaps of any of the following: Invulnerable - Turn on this cheating makes your immune your survivors to spoil. You can explore the island independently without fear of death. Super Stats - While Super Stats are on, your Survivor will have indistinguishable Stamina, Health, Oxygen and Carry Weight. Flying - This cheat allows your Survivors to fly around the island. Tapping this button will again return your players to the ground. Instant Craft - With Instant Craft on, all craft engram immediately. This completely eliminates the waiting time from making large piles of items. Bright night - Turning on this cheat increases vision at night, similar to the Shadow Steak Saute effect. Ammo incense - Don't run out of bullets anymore! These cheats work on all kinds of ammunition including bullets, C4, Slez, etc. Please note that you must first put 1 unit of ammunition into the weapon to fight fire indefinitely. Increase Yourself / Target - Tap this button gives you the amount of XP needed to get to the next level. For example, if you're sitting at 250/400 XP, then this cheat will give you 150 XP. When the creature is within your targeting range, this button changes to the Same Level Up Target and logic is used. Heal All - Heal All will immediately restore your Survivor, tamed creatures, Shields, Shields, and all your structures for full health. Speed - This feature allows you to change the speed of time on the island. Use this to accelerate breeding, breeding, hatching and/or maturity timers. You can toggle between the following speeds: 25%, 50%, 100%, 200%, and 400%. Suicide - Caught between a rock and a hard place? Use this button to kill your Survivor immediately and be brought back to the respawn menu. Hide UI - This button will turn off all UI elements on your screen. When you're done, the two-finger pipe on the left side of the screen will restore it. Teleport - Exploring this button will instantly teleport your Survivor to various locations around the island, including cave entrance & Obelisks. Advance Day - The Advance Day Button will instantly advance the day by 4 hours. Learn Engram - This feature allows you to instantly learn all the Instances in the game, regardless of your Survivor level. [1] Recolor's target - This resulted in the color scheme of the Creatures to be regrouped. Moratorium - This feature allows administrators on unofficial servers to set a time where creatures cannot be breed and the structure cannot be placed. Spotlight [edit | edit source] Notes [edit source] God's Console cannot be activated during Chase. Teleporting to someone while on the mountain will bring a mountain with you.
